JOURNAL OF SPACECRAFT AND ROCKETS
Volume 38, No. 6, November–December 2001

2001 *Journal of Spacecraft and Rockets* Index

How to Use the Index

In the Subject Index, pages 949–952, each technical paper is listed under a maximum of three appropriate headings. Note the locating number in boldface type preceding each paper title, and use that number to find the paper in the Chronological Index. The Author Index, page 953, lists all authors associated with a given technical paper. The locating numbers are identical to those in the Subject Index. The Chronological Index, pages 955–960, also lists all papers by their locating numbers. This listing contains titles, authors and their affiliations, and volume, issue number, and page where the paper appeared. It also gives the AIAA paper number, if any, on which the article was based, as well as the ISBN number if the paper was published in a bound collection of meetings papers. Comments, Replies, and Errata are listed directly beneath the paper to which they refer. If the paper to which they refer was published prior to 2001, that paper also will appear in both the Subject and Chronological Indexes. Authors of Comments also are listed in the Author Index.

Subject Index

Aircraft Technology, Conventional, STOL/VTOL

Aerodynamics

A01-106 Integrated Aeropropulsive Computional Fluid Dynamics Methodology for the Hyper-X Flight Experiment

A01-045 Aerodynamic Characteristics, Database Development, and Flight Simulation of the X-34 Vehicle

A01-102 Aerodynamic Database Development for the Hyper-X Airframe Integrated Scramjet Propulsion Experiments

A01-104 Computational Fluid Dynamics Prediction of Hyper-X Stage Separation Aerodynamics

A01-029 Design of Space Launch Vehicle Using Numerical Optimization and Inverse Method

A01-105 Hyper-X Research Vehicle Experimental Aerodynamics Test Program Overview

A01-100 Practical Prediction of Supersonic Viscous Flows over Complex Configurations Using Personal Computers

A01-111 Interactions Between a Canard and Thick Bodies: Analysis and Applications

Aeroelasticity and Aeroservoelasticity

A01-102 Aerodynamic Database Development for the Hyper-X Airframe-Integrated Scramjet Propulsion Experiments

Aerospace Plane

A01-001 Aerodynamic Heating Measurements on Nose and Elevon of Hypersonic Flight Experiment Vehicle

A01-107 Hyper-X Flight Engine Ground Testing for Flight Risk Reduction

Configuration Design

A01-029 Design of Space Launch Vehicle Using Numerical Optimization and Inverse Method

A01-112 The Interactions Between a Canard and Thick Bodies: Analysis and Applications

Flight Mechanics

A01-045 Aerodynamic Characteristics, Database Development, and Flight Simulation of the X-34 Vehicle

Noise

A01-015 Active Acoustic Control of a Rocket Fairing Using Spatially Weighted Transducer Arrays

Simulation

A01-045 Aerodynamic Characteristics, Database Development, and Flight Simulation of the X-34 Vehicle

A01-078 Direct Simulation of Apex Enhancement on the Flux onto European Retrievable Carrier

Energy

Solar Power

A01-039 Thermal Characterization of a Direct Gain Solar Thermal Engine

Fluid Dynamics

Boundary Layers and Heat Transfer—Laminar

A01-001 Aerodynamic Heating Measurements on Nose and Elevon of Hypersonic Flight Experiment Vehicle

A01-063 Nonequilibrium Vibrational Kinetics of Air Hitting a Catalytic SiO_2 Surface

Boundary Layers and Heat Transfer—Turbulent

A01-089 Assessment of One- and Two-Equation Turbulence Models for Hypersonic Transitional Flows

A01-065 Theoretical and Experimental Modeling of Real Projectile Flight Heating

A01-026 Turbulent Boundary Layers with Foreign Gas Transpiration

Boundary-Layer Stability and Transition

A01-088 Effect of Noise on Roughness-Induced Boundary-Layer Transition for Scramjet Inlet

A01-044 Effects of High-Speed Tunnel Noise on Laminar-Turbulent Transition

A01-109 Hypersonic Boundary-Layer Trip Development for Hyper-X

A01-061 Infrared Sensing Aeroheating Flight Experiment: STS-96 Flight Results

A01-024 Transition Mechanisms in Conventional Hypersonic Wind Tunnels

A01-084 X-33 Hypersonic Boundary-Layer Transition

A01-119 Transitional Flow over an Elliptic Cone at Mach 8

Computational Fluid Dynamics

A01-109 A Multigrid Algorithm for Computing Hypersonic, Chemically Reacting Flows

A01-020 Aerodynamic Performance of a Rotate-to-View Nose Missile
A01-089 Assessment of One- and Two-Equation Turbulence Models for Hypersonic Transitional Flows
A01-101 Catalytic Model on SiO2-Based Surface and Application to Real Trajectory
A01-104 Computational Fluid Dynamics Prediction of Hyper-X Stage Separation Aerodynamics
A01-090 Computational Fluid Dynamics Analysis of a Missile with Grid Fins
A01-029 Design of Space Launch Vehicle Using Numerical Optimization and Inverse Method
A01-106 Integrated Aeropropulsive Computational Fluid Dynamics Methodology for the Hyper-X Flight Experiment
A01-110 Kinectic Analysis of Hypersonic Laminar Separated Flows for Hollow Cylinder Flare Configurations
A01-022 Lateral-Directional Coupling and Unsteady Aerodynamics of Hypersonic Vehicles
A01-068 Numerical Simulation of Three-Dimensional Augmented Burnett Equations for Hypersonic Flow
A01-100 Practical Prediction of Supersonic Viscous Flows over Complex Configurations Using Personal Computers
A01-051 Review of Hall Thruster Plume Modeling
A01-003 Roll Effects on Carryover for Hypersonic Delta Fin Missiles
A01-024 Transition Mechanisms in Conventional Hypersonic Wind Tunnels

Hypersonic Flow

A01-119 Blow-Down Arc Facility for Low-Density Hypersonic Wind-Tunnel Testing
A01-109 Multigrid Algorithm for Computing Hypersonic, Chemically Reacting Flows
A01-001 Aerodynamic Heating Measurements on Nose and Elevon of Hypersonic Flight Experiment Vehicle
A01-089 Assessment of One- and Two-Equation Turbulence Models for Hypersonic Transitional Flows
A01-101 Catalytic Model on SiO2-Based Surface and Application to Real Trajectory
A01-104 Computational Fluid Dynamics Prediction of Hyper-X Stage Separation Aerodynamics
A01-067 Critical Design Issues for Airbreathing Hypersonic Waverider Missiles
A01-088 Effect of Noise on Roughness-Induced Boundary-Layer Transition for Scramjet Inlet
A01-044 Effects of High-Speed Tunnel Noise on Laminar-Turbulent Transition
A01-018 Experimental Analysis of Aerodynamic Interactions Occurring on Hypersonic Spacecraft
A01-107 Hyper-X Flight Engine Ground Testing for Flight Risk Reduction
A01-108 Hypersonic Boundary-Layer Trip Development for Hyper-X
A01-064 Investigation of Hypersonic Compression Ramp Heating at High Angles of Attack
A01-110 Kinectic Analysis of Hypersonic Laminar Separated Flows for Hollow Cylinder Flare Configurations
A01-022 Lateral-Directional Coupling and Unsteady Aerodynamics of Hypersonic Vehicles
A01-068 Numerical Simulation of Three-Dimensional Augmented Burnett Equations for Hypersonic Flow
A01-003 Roll Effects on Carryover for Hypersonic Delta Fin Missiles
A01-024 Transition Mechanisms in Conventional Hypersonic Wind Tunnels

Inlet, Nozzle, Diffuser, and Channel Flows

A01-007 Computational Investigation of a Method to Compress Air Fluidically in Supersonic Inlets
A01-088 Effect of Noise on Roughness-Induced Boundary-Layer Transition for Scramjet Inlet
A01-018 Experimental Analysis of Aerodynamic Interactions Occurring on Hypersonic Spacecraft

Jets, Wakes, and Viscid-Inviscid Flow Interactions

A01-007 Computational Investigation of a Method to Compress Air Fluidically in Supersonic Inlets
A01-019 Plume-On Base Drag Prediction Including Three-Dimensional and Real-Gas Effects

Plasmadynamics and MHD

A01-059 Near- and Far-Field Characterization of Stationary Plasma Thruster Plumes
A01-056 Near-Field Measurement and Modeling Results for Flight-Type Arcjet: Hydrogen Atom
A01-051 Review of Hall Thruster Plume Modeling

Rarefied Flows

A01-119 Blow-Down Arc Facility for Low-Density Hypersonic Wind-Tunnel Testing
A01-068 Numerical Simulation of Three-Dimensional Augmented Burnett Equations for Hypersonic Flow

Reacting Flows and Combustion

A01-109 Multigrid Algorithm for Computing Hypersonic, Chemically Reacting Flows
A01-025 Scaling Nonequilibrium-Reacting Flows: The Legacy of Gerhard Damköhler

Separated Flows

A01-064 Investigation of Hypersonic Compression Ramp Heating at High Angles of Attack
A01-110 Kinectic Analysis of Hypersonic Laminar Separated Flows for Hollow Cylinder Flare Configurations
A01-023 Unsteady Flow Separation Can Endanger the Structural Integrity of Aerospace Launch Vehicles

Shock Waves and Detonations

A01-026 Turbulent Boundary Layers with Foreign Gas Transpiration

Supersonic Flow

A01-090 Computational Fluid Dynamics Analysis of a Missile with Grid Fins
A01-100 Practical Prediction of Supersonic Viscous Flows over Complex Configurations Using Personal Computers
A01-065 Theoretical and Experimental Modeling of Real Projectile Flight Heating

Transonic Flow

A01-013 Transient Coupling of Launch Vehicle Bending Responses with Aerodynamics Flow State Variations

Unsteady Flows

A01-023 Unsteady Flow Separation Can Endanger the Structural Integrity of Aerospace Launch Vehicles

Guidance, Control, and Dynamics Technology

Astrodynamics

A01-079 Development of a Target Marker for Landing on Asteroids
A01-047 Direct High-Speed Interception: Analytic Solutions, Qualitative Analysis, and Applications
A01-115 Dynamic Behavior of a Tethered System with Multiple Subsatellites in Elliptic Orbits
A01-096 Gravitational Effects of Earth in Optimizing ΔV for Deflecting Earth-Crossing Asteroids
A01-093 Low-Cost Main-Belt Asteroid Sample Return
A01-016 Orbital Debris Hazard Assessment Methodologies for Satellite Constellations
A01-038 Solar Sail Orbit Operations at Asteroids

Dynamics

A01-079 Development of a Target Marker for Landing on Asteroids
A01-078 Direct Simulation of Apex Enhancement on the Flux onto European Retrievable Carrier

Launch Vehicle Dynamics

A01-030 Active Structural-Acoustic Control of a Rocket Fairing Using Proof-Mass Actuators
A01-013 Transient Coupling of Launch Vehicle Bending Responses with Aerodynamics Flow State Variations

Navigation

A01-079 Development of a Target Marker for Landing on Asteroids

Optimization Techniques

A01-113 Analytical Space Trajectories for Extermal Motion with Low-Thrust Exhaust-Modulated Propulsion
A01-004 Design of a Guided Missile Interceptor Using a Genetic Algorithm
A01-096 Gravitational Effects of Earth in Optimizing ΔV for Deflecting Earth-Crossing Asteroids

Spacecraft Dynamics

A01-022 Lateral-Directional Coupling and Unsteady Aerodynamics of Hypersonic Vehicles
A01-016 Orbital Debris Hazard Assessment Methodologies for Satellite Constellations

Spacecraft Guidance and Control

A01-082 GEOSAIL: Exploring the Geomagnetic Tail Using a Small Solar Sail

Structural Control

A01-050 Integrated Vibration Control for the Apparatus Cabin of CZ-3A Launch Vehicle

Trajectory Optimization

A01-113 Analytical Space Trajectories for Extermal Motion with Low-Thrust Exhaust-Modulated Propulsion

A01-095 Comparison of Glideback and Flyback Boosters
A01-119 Transitional Flow Over an Elliptic Cone at Mach 8

Interdisciplinary Topics

Analytical and Numerical Methods

A01-098 Gasdynamics and Heat Transfer Modeling in Rocket Joints

Atmospheric and Space Sciences

A01-078 Direct Simulation of Apex Enhancement on the Flux onto European Retrievable Carrier
A01-063 Nonequilibrium Vibrational Kinetics of Air Hitting a Catalytic SiO_2 Surface
A01-076 Proton Spectra Detected by the Proton Switches on the CRRES Satellite
A01-077 Validation of In Situ Ionospheric Density Measurements with Ground-Based Radar

Reliability, Maintainability, and Logistics Support

A01-099 Reliability Analysis of Space Exploration Truss Support Structures

Research Facilities and Instrumentation

A01-044 Effects of High-Speed Tunnel Noise on Laminar-Turbulent Transition
A01-076 Proton Spectra Detected by the Proton Switches on the CRRES Satellite

Launch Vehicle and Missile (LV/M) Technology

Aerodynamics

A01-102 Aerodynamic Database Development for the Hyper-X Airframe-Integrated Scramjet Propulsion Experiments
A01-020 Aerodynamic Performance of a Rotate-to-View Nose Missile
A01-090 Computational Fluid Dynamics Analysis of a Missile with Grid Fins
A01-103 Hyper-X Stage Separation Wind Tunnel Test Program
A01-019 Plume-On Base Drag Prediction Including Three-Dimensional and Real-Gas Effects
A01-021 Semiempirical Prediction of Pitch Damping Moments for Configurations with Flares
A01-112 Interactions Between a Canard and Thick Bodies-Analysis and Applications
A01-086 X-33 Hypersonic Aerodynamic Characteristics

Configuration Design

A01-095 Comparison of Glideback and Flyback Boosters
A01-004 Design of a Guided Missile Interceptor Using a Genetic Algorithm
A01-021 Semiempirical Prediction of Pitch Damping Moments for Configurations with Flares
A01-049 Semireusable Launch Vehicle: A Next-Generation Launch Vehicle?

Launch Vehicle and Sounding Rocket Systems

A01-015 Active Acoustic Control of a Rocket Fairing Using Spatially Weighted Transducer Arrays
A01-049 Semireusable Launch Vehicle: A Next-Generation Launch Vehicle?

Missile Systems

A01-020 Aerodynamic Performance of a Rotate-to-View Nose Missile
A01-021 Semiempirical Prediction of Pitch Damping Moments for Configurations with Flares

Mission Studies and Economics

A01-042 Thermal Protection System Materials and Costs for Future Reusable Launch Vehicles

Simulation

A01-103 Hyper-X Stage Separation Wind Tunnel Test Program

Testing, Flight and Ground

A01-073 Design and Testing of Reduced-Stiffness Umbilicals for Space Station Microgravity Isolation
A01-103 Hyper-X Stage Separation Wind Tunnel Test Program
A01-061 Infrared Sensing Aeroheating Flight Experiment: STS-96 Flight Results

Thermal Protection Systems

A01-042 Thermal Protection System Materials and Costs for Future Reusable Launch Vehicles
A01-062 Two-Dimensional Implicit Thermal Response and Ablation Program for Charring Materials

Vibration

A01-050 Integrated Vibration Control for the Apparatus Cabin of CZ-3A Launch Vehicle

Propulsion

Airbreathing Propulsion

A01-067 Critical Design Issues for Airbreathing Hypersonic Waverider Missiles
A01-108 Hypersonic Boundary-Layer Trip Development for Hyper-X
A01-025 Scaling Nonequilibrium-Reacting Flows: The Legacy of Gerhard Damköhler

Electric and Advanced Space Propulsion

A01-060 Experimental Investigations and Numerical Modeling of Pulsed Plasma Thruster Plumes
A01-059 Near- and Far-Field Characterization of Stationary Plasma Thruster Plumes
A01-010 Near-Field Measurement and Modeling Results for a Flight-Type Arcjet: NH Molecule
A01-051 Review of Hall Thruster Plume Modeling
A01-038 Solar Sail Orbit Operations at Asteroids
A01-034 Solar-Electric Planetary Missions with an Initial Out-of-Ecliptic Thrust Phase
A01-009 Three-Dimensional Numerical Simulation of Field-Emmison-Electric-Propulsion Backflow Contamination

Ramjets and Scramjets

A01-007 Computational Investigation of a Method to Compress Air Fluidically in Supersonic Inlets

Solid Rocket Motors and Missile Systems

A01-098 Gasdynamics and Heat Transfer Modeling in Rocket Joints

Supersonic Combustion

A01-107 Hyper-X Flight Engine Ground Testing for Flight Risk Reduction

Space Technology

Aerobraking Configurations/Aerothermodynamics

A01-084 X-33 Hypersonic Boundary-Layer Transition

Landers

A01-092 Mars Rocket Vehicle Using In-Situ Propellants

Mission Design and Analysis

A01-095 Comparison of Glideback and Flyback Boosters
A01-036 Development of the Quantitative Generalized Information Network Analysis Methodology for Satellite Systems
A01-046 Entry Dispersion Analysis for the Genesis Sample Return Capsule
A01-082 GEOSAIL: Exploring the Geomagnetic Tail Using a Small Solar Sail
A01-096 Gravitational Effects of Earth in Optimizing ΔV for Deflecting Earth-Crossing Asteroids
A01-093 Low-Cost Main-Belt Asteroid Sample Return
A01-092 Mars Rocket Vehicle Using In-Situ Propellants
A01-034 Solar-Electric Planetary Missions with an Initial Out-of-Ecliptic Thrust Phase

Mission Trajectories (Earth and Interplanetary)

A01-113 Analytical Space Trajectories for Extremal Motion with Low-Thrust Exhaust-Modulated Propulsion
A01-082 GEOSAIL: Exploring the Geomagnetic Tail Using a Small Solar Sail
A01-093 Low-Cost Main-Belt Asteroid Sample Return
A01-038 Solar Sail Orbit Operations at Asteroids
A01-034 Solar-Electric Planetary Missions with an Initial Out-of-Ecliptic Thrust Phase

Space Experiments

A01-074 Study of Long Duration Exposure Facility Contaminated Chromic-Acid-Anodized Surfaces
A01-077 Validation of In Situ Ionospheric Density Measurements with Ground-Based Radar

Space Systems

A01-033 Attitude Maneuver of Dual Tethered Satellite Platforms Through Tether Offset Change
A01-036 Development of the Quantitative Generalized Information Network Analysis Methodology for Satellite Systems

A01-072 Evolution of Debris Clouds to Microscopically Chaotic Motion
A01-016 Orbital Debris Hazard Assessment Methodologies for Satellite Constellations
A01-041 Payload Deployment by Resuable Launch Vehicle Using Tether
A01-049 Semireusable Launch Vehicle: A Next-Generation Launch Vehicle?

Spacecraft Communication

A01-035 Investigation of Remote Antenna Assembly for Radio Communication with Reentry Vehicle

Spacecraft Contamination/Sterilization

A01-054 Design Considerations for Cryogenic Pumping Arrays in Spacecraft–Thruster Interaction Facilities
A01-074 Study of Long Duration Exposure Facility Contaminated Chromic-Acid-Anodized Surfaces
A01-009 Three-Dimensional Numerical Simulation of Field-Emmison-Electric-Propulsion Backflow Contamination

Spacecraft Propulsion System Integration

A01-054 Design Considerations for Cryogenic Pumping Arrays in Spacecraft–Thruster Interaction Facilities
A01-092 Mars Rocket Vehicle Using In-Situ Propellants
A01-059 Near- and Far-Field Characterization of Stationary Plasma Thruster Plumes
A01-010 Near-Field Measurement and Modeling Results for a Flight-Type Arcjet: NH Molecule

Spacecraft Radiation Protection

A01-012 High-Energy Electron Exposure Testing of Traveling-Wave-Tube Amplifiers
A01-011 Single Event Effects Test Results and Their Applications to Spacecraft Electronics

Spacecraft Sensor Systems

A01-077 Validation of In Situ Ionospheric Density Measurements with Ground-Based Radar

Spacecraft Structural Configuration, Design, and Analysis

A01-115 Dynamic Behavior of a Tethered System with Multiple Subsatellites in Elliptic Orbits
A01-099 Reliability Analysis of Space Exploration Truss Support Structures
A01-028 Thermal Load Effects on Precision Membranes

Spacecraft Thermal Management

A01-118 Optimization of a Low-Gravity Two-Phase System for Lunar Heat Rejection
A01-066 Measurement and Evaluation of Thermal Control Material with Polymide for Space Use
A01-074 Study of Long Duration Exposure Facility Contaminated Chromic-Acid-Anodized Surfaces

Structural Mechanics and Materials

Aeroelasticity and Control

A01-013 Transient Coupling of Launch Vehicle Bending Responses with Aerodynamics Flow State Variations
A01-023 Unsteady Flow Separation Can Endanger the Structural Integrity of Aerospace Launch Vehicles

Flexible and Active Structures

A01-015 Active Acoustic Control of a Rocket Fairing Using Spatially Weighted Transducer Arrays
A01-030 Active Structural-Acoustic Control of a Rocket Fairing Using Proof-Mass Actuators
A01-050 Integrated Vibration Control for the Apparatus Cabin of CZ-3A Launch Vehicle
A01-028 Thermal Load Effects on Precision Membranes

Structural Durability (Including Fatigue, Fracture, and Environmental Degradation)

A01-099 Reliability Analysis of Space Exploration Truss Support Structures

Structural Dynamics and Characterization

A01-073 Design and Testing of Reduced-Stiffness Umbilicals for Space Station Microgravity Isolation
A01-115 Dynamic Behavior of a Tethered System with Multiple Subsatellites in Elliptic Orbits

Thermal Effects

A01-083 Evaluation of High-Temperature Multilayer Insulation for Inflatable Ballute
A01-028 Thermal Load Effects on Precision Membranes

Thermophysics and Heat Transfer

Ablation, Pyrolysis, Thermal Decomposition, and Degradation

A01-062 Two-Dimensional Implicit Thermal Response and Ablation Program for Charring Materials

Aerothermodynamics/Thermal Protection

A01-101 Catalytic Model on SiO_2-Based Surface and Application to Real Trajectory
A01-083 Evaluation of High-Temperature Multilayer Insulation for Inflatable Ballute
A01-002 Numerical Analysis of Convection/Transpiration Cooling
A01-025 Scaling Nonequilibrium-Reacting Flows: The Legacy of Gerhard Damköhler
A01-084 X-33 Hypersonic Boundary-Layer Transition

Computational Heat Transfer

A01-048 Heat Transfer Through Cryogenic Propellant Tank Insulation During Ground-Hold Conditions

Cryogenics

A01-048 Heat Transfer Through Cryogenic Propellant Tank Insulation During Ground-Hold Conditions

Forced Convection

A01-064 Investigation of Hypersonic Compression Ramp Heating at High Angles of Attack

Heat Pipes

A01-118 Optimization of a Low-Gravity Two-Phase System for Lunar Heat Rejection

Thermal Control

A01-066 Measurement and Evaluation of Thermal Control Material with Polymide for Space Use

Thermal Modeling and Analysis

A01-118 Optimization of a Low-Gravity Two-Phase System for Lunar Heat Rejection
A01-098 Gasdynamics and Heat Transfer Modeling in Rocket Joints
A01-048 Heat Transfer Through Cryogenic Propellant Tank Insulation During Ground-Hold Conditions
A01-002 Numerical Analysis of Convection/Transpiration Cooling
A01-065 Theoretical and Experimental Modeling of Real Projectile Flight Heating
A01-039 Thermal Characterization of a Direct Gain Solar Thermal Engine
A01-062 Two-Dimensional Implicit Thermal Response and Ablation Program for Charring Materials

Thermochemistry and Chemical Kinetics

A01-063 Nonequilibrium Vibrational Kinetics of Air Hitting a Catalytic SiO2 Surface

Chronological Index

A01-001 Aerodynamic Heating Measurements on Nose and Elevon of Hypersonic Flight Experiment Vehicle. Keisuke Fujii, Shigeya Watanabe, Takuji Kurotaki, and Masao Shirouzu, *National Aerospace Laboratory, Japan* (**38**, 1, p. 8) Article based on AIAA Paper 2000-0267

A01-002 Numerical Analysis of Convection/ Transpiration Cooling. David E. Glass, Arhtur D. Dilley, and H. Neale Kelly, *Analytical Services & Materials, Inc.*, (**38**, 1, p. 15) Article based on AIAA Paper 99-4911

A01-003 Roll Effects on Carryover for Hypersonic Delta Fin Missiles. H. F. Nelson, *University of Missouri-Rolla* (**38**, 1, p. 21) Article based on AIAA Paper 2000-0388

A01-004 Design of a Guided Missile Interceptor Using a Genetic Algorithm. M. B. Anderson, *Sverdrup Technology, Inc*; J. E. Burkhalter and R. M. Jenkins, *Auburn University* (**38**, 1, p. 28) Article

A01-005 Concept and Preliminary Flight Testing of a Fully Reusable Rocket Vehicle. Yoshifumi Inatani and Yoshihiro Naruo, *Institute of Space and Astronautical Science, Japan*; and Koich Yonemoto, *Kawasaki Heavy Industries, Japan* (**38**, 1, p. 36) Article based on AIAA Paper 99-4874

A01-006 Space Station Mir Aerodynamics Along the Descent Trajectory. G. N. Markelov, A. V. Kashkovsky, and M. S. Ivanov, *Institute of Theoretical and Applied Mechanics, Russia* (**38**, 1, p. 43) Article

A01-007 Computational Investigation of a Method to Compress Air Fluidically in Supersonic Inlets. Richard G. Haws, Jeff S. Noall, and Russell L. Daines, *Bringham Young Universiity* (**38**, 1, p. 51) Article based on AIAA Paper 99-0084

A01-008 Advanced Tether Experiment Deployment Failure. Stephen S. Gates, Stephen M. Koss, and Michael F. Zedd, *Naval Research Laboratory* (**38**, 1, p. 60) Article based on AIAA Paper 99-413

A01-009 Three-Dimensional Numerical Simulation of Field-Emmison-Electric-Propulsion Backflow Contamination. M. Tajmar, *Austrian Research Centers Seibersdorf, Austria*; J. Wang, *Jet Propulsion Laboratory, California Institute of Technology* (**38**, 1, p. 69) Article

A01-010 Near-Field Measurement and Modeling Results for a Flight-Type Arcjet: NH Molecule. Mark W. Crofton and Teresa A. Moore, *The Aerospace Corporation*; Iain D. Boyd, *University of Michigan*; Ideo Masuda, *DNational Space Development Agency, Japan*; and Yoshifumi Gotoh, *Mitsubishi Electric Corporation, Japan* (**38**, 1, p. 79) Article

A01-011 Single Event Effects Test Results and Their Applications to Spacecraft Electronics. Alexander Bogorad, Roman Herschitz, Steve Moyer, Surinder Seehra, and Roy Kong, *Lockheed Martin Corporation* (**38**, 1, p. 87) Article

A01-012 High-Energy Electron Exposure Testing of Traveling-Wave-Tube Amplifiers. Alexander Bogorad, Herbert Wolkstein, and Roman Herschitz, *Lockheed Martin Corporation* (**38**, 1, p. 92) Article

A01-013 Transient Coupling of Launch Vehicle Bending Responses with Aerodynamics Flow State Variations. K. W. Dotson, *The Aerospace Corporation* (**38**, 1, p. 97) Article

A01-014 Result of Autonomous Rendezvous Docking Experiment of Engineering Test Satellite-VII (ETS-VII). Isao Kawano, Masaaki Mokuno, Toru Kasai, and Takashi Suzuki, *National Space Development Agency of Japan, Japan* (**38**, 1, p. 105) Article

A01-015 Active Acoustic Control of a Rocket Fairing Using Spatially Weighted Transducer Arrays. Steven A. Lane, *Jackson and Tull Engineering*; Jonathan D. Kemp, *Duke University*; Steven Griffith, *Air Force Research Laboratory*; and Robert L. Clark, *Duke University* (**38**, 1, p. 112) Article

A01-016 Orbital Debris Hazard Assessment Methodologies for Satellite Constellations. David B. Spencer, *Pennsylvania State University*; K. Kim Luu, *U.S. Air Force Research Laboratory*; and W. Spencer Campbell, Marlon E. Sorge, and Alan B. Jenkin, *The Aerospace Corporation* (**38**, 1, p. 120) Article

A01-017 Miniature Launch Vehicles for Very Small Payloads. Frederick W. Boltz, *NASA Ames Research Center* (**38**, 1, p. 126) Engineering Note

A01-018 Experimental Analysis of Aerodynamic Interactions Occurring on Hypersonic Spacecraft. Philippe Reijasse, Reynald Bur, and Bruno Chanetz, *ONERA, France* (**38**, 2, p. 129) Article based on AIAA Paper 99-0610

A01-019 Plume-On Base Drag Prediction Including Three-Dimensional and Real-Gas Effects. G. Rubio, A. Matesanz, and A. Velázquez, *SENER Ingeniería y Sistemas, S.A., Spain* (**38**, 2, p. 136) Article

A01-020 Aerodynamic Performance of a Rotate-to-View Nose Missile. B. Srivastava and J. Furtek, *Raytheon Electronic Systems* (**38**, 2, p. 143) Article based on AIAA Paper 99-1068

A01-021 Semiempirical Prediction of Pitch Damping Moments for Configurations with Flares. F. G. Moore, *Aeroprediction, Inc.*; and T. C. Hymer, *U.S. Naval Survace Warfare Center* (**38**, 2, p. 150) Article based on AIAA Paper 01-0101

A01-022 Lateral-Directional Coupling and Unsteady Aerodynamics of Hypersonic Vehicles. Christian Breitsamter, Tomislav Cvrlje, Boris Laschka, Matthias Heller, and Gottfried Sachs, *Technische Universitat Munchen, Germany* (**38**, 2, p. 159) Article based on AIAA Paper 99-4832

A01-023 Unsteady Flow Separation Can Endanger the Structural Integrity of Aerospace Launch Vehicles. Lars E. Ericsson, (**38**, 2, p. 168) Article

A01-024 Transition Mechanisms in Conventional Hypersonic Wind Tunnels. R. D. McDaniel and H. A. Hassan, *North Carolina State University* (**38**, 2, p. 180) Article

A01-025 Scaling Nonequilibrium-Reacting Flows: The Legacy of Gerhard Damköhler. George R. Inger, *Iowa State University* (**38**, 2, p. 185) Article

A01-026 Turbulent Boundary Layers with Foreign Gas Transpiration. Jens Meinert and Jörg Huhn, *Dresden University of Technology, Germany*; and Erhan Serbest and Oskar J. Haidn, *German Aerospace Center (DLR), Germany* (**38**, 2, p. 191) Article based on AIAA Paper 2000-3386

A01-027 Experimental Investigation of Reentry Vehicle Aerothermodynamic Problems in Arc-Heated Facilities. A. Gülhan, *DLR, German Aerospace Research Center, Germany*; and Burkard Esser and Uwe Koch, *German Aerospace Center (DLR), Germany* (**38**, 2, p. 199) Article
Errata (**38**, 4, p. 632)

A01-028 Thermal Load Effects on Precision Membranes. C. H. Jenkins, *South Dakota School of Mines and Technology*; and S. M. Faisal, *Federal Mogul Corporation* (**38**, 2, p. 207) Article

A01-029 Design of Space Launch Vehicle Using Numerical Optimization and Inverse Method. Jae-Woo Lee, Young-Ki Lee, and Yung-Hiuan Byun, *Konkuk University, Korea*; and Ho-Yon Hwang, *Sejong University, Korea* (**38**, 2, p. 212) Article

A01-030 Active Structural-Acoustic Control of a Rocket Fairing Using Proof-Mass Actuators. Steven Griffin, *U.S. Air Force Research Laboratory*; Steven A. Lane, *Jackson and Tull Engineering*; and Colin Hansen and Ben Cazzolato, *University of Adelaide, Australia* (**38**, 2, p. 219) Article

A01-031 Multifunctional Structures for Advanced Spacecraft. David M. Barnett, Suraj Rawal, and Kevin Rummel, *Lockheed Maritn Space Systems Company* (**38**, 2, p. 226) Article

A01-032 Compressive Response of Lightweight Ceramic Ablators: Phenolic Impregnated Carbon Ablator. Kelly E. Parmenter and Karl Shuman, *University of California*; Frederick Milstein, *University of California, Santa Barbara*; and Christine E. Szalai, Huy K. Tran, and Daniel J. Rasky, *NASA-AMES* (**38**, 2, p. 231) Article

A01-033 Attitude Maneuver of Dual Tethered Satellite Platforms Through Tether Offset Change. K. D. Kumar, *National Aaerospace Laboratory, Japan*; and Krishna Kumar, *Indian Institute of Technology, India* (**38**, 2, p. 237) Article

A01-034 Solar-Electric Planetary Missions with an Initial Out-of-Ecliptic Thrust Phase. Hans F. Meissinger and Simon Dawson, *Microcosm, Inc.* (**38**, 2, p. 243) Article based on AIAA Paper 99-2869

A01-035 Investigation of Remote Antenna Assembly for Radio Communication with Reentry Vehicle. I. F. Belov, V. Ya. Borovoy, and V. A. Gorelov, *Central Aerohydrodynamic Institute, Russia*; A. Y. Kireev and A. S. Korolev, *Central Aerohydrodynamic Institute , Russia*; and E. A. Stepanov, *Central Aerohydrodynamic Institute, Russia* (**38**, 2, p. 249) Article based on AIAA Paper 99-3739

A01-036 Development of the Quantitative Generalized Information Network Analysis Methodology for Satellite Systems. Graeme B. Shaw, D. W. Miller, and D. E. Hastings, *Massachusetts Institute of Technology* (**38**, 2, p. 257) Article

A01-037 Satellite Formation Flying Design and Evolution. Chris Sabol, Rich Burns, and Craig A. McLaughlin, *U.S. Air Force Research Laboratory* (**38**, 2, p. 270) Article

A01-038 Solar Sail Orbit Operations at Asteroids . Esther Morrow, *University of California*; D. J. Scheeres, *University of Michigan*; and Dan Lubin, *University of California* (**38**, 2, p. 279) Article

A01-039 Thermal Characterization of a Direct Gain Solar Thermal Engine. Reginald A. Alexander, *NASA Marshall Space Flight Center*; and Hugh W. Coleman, *University of Alabama in Huntsville* (**38**, 2, p. 287) Engineering Note

A01-040 Radiation Exposure Comparison of Venus and Mars Flyby Trajectories. Timothy Crain, Robert H. Bishop, Wallace Fowler, *University of Texas at Austin*; and Kenneth Rock, *Motorola* (**38**, 2, p. 289) Engineering Note

A01-041 Payload Deployment by Resuable Launch Vehicle Using Tether. K. D. Kumar, *National Aaerospace Laboratory, Japan* (**38**, 2, p. 291) Engineering Note

A01-042 Thermal Protection System Materials and Costs for Future Reusable Launch Vehicles. D. J. Rasky, F. S. Milos, and T. H. Squire, *NASA Ames Research Center* (**38**, 2, p. 294) Engineering Note

A01-043 Overview and Summary of Results and Significant Findings from the CIRRIS-1A Experiment. J. O. Wise, D. R. Smith, N. B. Wheeler, M. Ahmadjian, and R. M. Nadile, *U.S. Air Force Research Laboratory*; and B. F. Sullivan, *Boston College* (**38**, 3, p. 297) Article

A01-044 Effects of High-Speed Tunnel Noise on Laminar-Turbulent Transition. Steven P. Schneider, *Purdue University* (**38**, 3, p. 323) Article

A01-045 Aerodynamic Characteristics, Database Development, and Flight Simulation of the X-34 Vehicle. Bandu N. Pamadi and Gregory J. Brauckmann, *NASA Langley Research Center*; and Michael J. Ruth and Henri D. Fuhrmann, *Orbital* (**38**, 3, p. 334) Article based on AIAA Paper 2000-0900

A01-046 Entry Dispersion Analysis for the Genesis Sample Return Capsule. Prasun N. Desai and F. McNeil Cheatwood, *NASA Langley Research Center* (**38**, 3, p. 345) Article

A01-047 Direct High-Speed Interception: Analytic Solutions, Qualitative Analysis, and Applications. Yuri Ulybyshev, *Rocket-Space Corporation "Energia" , Russia* (**38**, 3, p. 351) Article

A01-048 Heat Transfer Through Cryogenic Propellant Tank Insulation During Ground-Hold Conditions. T. K. Nandi, *Birla Institute of Technology, India* (**38**, 3, p. 360) Article

A01-049 Semireusable Launch Vehicle: A Next-Generation Launch Vehicle?. Edgar A. Staniszewski, *MAN Technologie AG, Germany* (**38**, 3, p. 368) Article

A01-050 Integrated Vibration Control for the Apparatus Cabin of CZ-3A Launch Vehicle. J. H. Zhang, S. L. Xie, and X. N. Zhang, *Xi'an Jiaotong University, PRC*; and Z. M. Li, *China Academy of Launch Vehicle Technology, PRC* (**38**, 3, p. 374) Article

A01-051 Review of Hall Thruster Plume Modeling. Iain D. Boyd, *University of Michigan* (**38**, 3, p. 381) Article

A01-052 Applying Contamination Modeling to Spacecraft Conventional Propulsion System Designs and Operations. Philip T. Chen and Shaun Thomson, *NASA Goddard Space Flight Center*; and Michael S. Woronowicz, *Swales Aerospace* (**38**, 3, p. 388) Article

A01-053 Modeling of Spacecraft-Environment Interactions on SMART-1. M. Tajmar, *Austrian Research Centers Seibersdorf, Austria*; and J. González and A. Hilgers, *ESA, The Netherlands* (**38**, 3, p. 393) Article

A01-054 Design Considerations for Cryogenic Pumping Arrays in Spacecraft–Thruster Interaction Facilities. Andrew D. Ketsdever, *Air Force Research Laboratory* (**38**, 3, p. 400) Article

A01-055 Plume Mass Spectrometry with a Hydrazine Arcjet Thruster. James E. Pollard, *The Aerospace Corporation*; Ideo Masuda, *National Space Development Agency, Japan*; and Yoshifumi Gotoh, *Mitsubishi Electric Corporation, Japan* (**38**, 3, p. 411) Article

A01-056 Near-Field Measurement and Modeling Results for Flight-Type Arcjet: Hydrogen Atom. Mark W. Crofton and Teresa A. Moore, *The Aerospace Corporation*; Iain D. Boyd, *University of Michigan*; Ideo Masuda, *National Space Development Agency, Japan*; and Yoshifumi Gotoh, *Mitsubishi Electric Corporation, Japan* (**38**, 3, p. 417) Article

A01-057 Deep Space 1 Measurements of Ion Propulsion Contamination. D. Brinza, J. Wang, J. Polk, and M. Henry, *Jet Propulsion Laboratory, California Institute of Technology* (**38**, 3, p. 426) Article

A01-058 Three-Dimensional Particle Simulations of Ion Propulsion Plasma Environment for Deep Space 1. J. Wang and D. Brinza, *Jet Propulsion Laboratory, California Institute of Technology*; and M. Young, *University of Southern California* (**38**, 3, p. 433) Article

A01-059 Near- and Far-Field Characterization of Stationary Plasma Thruster Plumes. Alec D. Gallimore, *University of Michigan* (**38**, 3, p. 441) Article

A01-060 Experimental Investigations and Numerical Modeling of Pulsed Plasma Thruster Plumes. Nikolaos A. Gatsonis, Robert Eckman, and Xuemin Yin, *Worcester Polytechnic Institute*; and Eric J. Pencil and Roger M. Meyers, *NASA John H. Glenn Research Center* (**38**, 3, p. 454) Article

A01-061 Infrared Sensing Aeroheating Flight Experiment: STS-96 Flight Results. Robert C. Blanchard, Richard G. Wilmoth, Christopher E. Glass, N. Ronald Merski, Jr., and Scott A. Berry, *NASA Langley Research Center*; and Timothy J. Bozung, *George Washington University* (**38**, 4, p. 465) Article

A01-062 Two-Dimensional Implicit Thermal Response and Ablation Program for Charring Materials. Y. -K. Chen and F. S. Milos, *NASA Ames Research Center* (**38**, 4, p. 473) Article

A01-063 Nonequilibrium Vibrational Kinetics of Air Hitting a Catalytic SiO2 Surface. I. Armenise, M. Capitelli, and C. Gorse, *Bari University, Italy* (**38**, 4, p. 482) Article based on AIAA Paper 2000-2365

A01-064 Investigation of Hypersonic Compression Ramp Heating at High Angles of Attack. Koichi Hozumi, Yukimitsu Yamamoto, and Keisuke Fujii, *National Aerospace Laboratory, Japan*; Jean-Paul Ledy, *ONERA, France*; Dominique Devezeaux, *Office National d'Etudes et de Recherches Aerospatiales, France*; and Joëlle Fontaine, *ONERA, France* (**38**, 4, p. 488) Article

A01-065 Theoretical and Experimental Modeling of Real Projectile Flight Heating. Friedrich Seiler, Udo Werner, and Gunther Patz, *French-German Research Institute of Saint-Louis, France* (**38**, 4, p. 497) Article

A01-066 Measurement and Evaluation of Thermal Control Material with Polymide for Space Use. Minoru Iwata, *Tokai University, Japan*; Akira Ohnishi and Haruto Hirosawa, *Institute of Space and Astronautical Science, Japan*; and Fumio Tohyama, *Tokai University, Japan* (**38**, 4, p. 504) Article

A01-067 Critical Design Issues for Airbreathing Hypersonic Waverider Missiles. Ryan P. Starkey and Mark J. Lewis, *University of Maryland* (**38**, 4, p. 510) Article

A01-068 Numerical Simulation of Three-Dimensional Augmented Burnett Equations for Hypersonic Flow. Keon-Young Yun and Ramesh K. Agarwal, *Wichita State University* (**38**, 4, p. 520) Article

A01-069 Effects of Boattailing on the Turbulence Structure of a Compressible Base Flow. C. J. Bourdon and J. C. Dutton, *University of Illinois at Urbana–Champaign* (**38**, 4, p. 534) Article

A01-070 Magnus Effect over Finned Projectiles. Marc Pechier and Philippe Guillen, *Onera, France*; and Roxan Cayzac, *Giat Industries, France* (**38**, 4, p. 542) Article

A01-071 Meteoroid and Debris Impact Life of Spacecraft Optics. Ray Erikson, *Erikson Technical Associates* (**38**, 4, p. 550) Article

A01-072 Evolution of Debris Clouds to Microscopically Chaotic Motion. John P.W. Stark, *University of London, England, UK* (**38**, 4, p. 554) Article

A01-073 Design and Testing of Reduced-Stiffness Umbilicals for Space Station Microgravity Isolation. Donald L. Edberg and Bruce W. Wilson, *The Boeing Company* (**38**, 4, p. 563) Article

A01-074 Study of Long Duration Exposure Facility Contaminated Chromic-Acid-Anodized Surfaces. S. L. B. Woll, V. A. Loebs, C. S. Phelps, and H. G. Pippin, *Boeing Phantom Works*; D. G. Crandall, *AZ Technologies*; and W. H. Kinard, *NASA Langely Research Center* (**38**, 4, p. 569) Article

A01-075 Astronaut-Induced Disturbances to the Microgravity Environment of the Mir Space Station. Dava J. Newman and Amir R. Amir, *Massachusetts Institute of Technology*; and Sherwin M. Beck, *NASA Langley Research Center* (**38**, 4, p. 578) Article

A01-076 Proton Spectra Detected by the Proton Switches on the CRRES Satellite. M. Cyamukungu and G. Grégoire, *Université Catholique de Louvain, Belgium, Institute de Physique Nucleaire, Belgium*; D. Heynderickx, M. Kruglanski, and J. Lemaire, *Belgian Institute for Space Aeronomy, Belgium*; and J. B. Blake, *The Aerospace Corporation* (**38**, 4, p. 584) Article

A01-077 Validation of In Situ Ionospheric Density Measurements with Ground-Based Radar. Peter J. Sultan and Frederick J. Rich, *U.S Air Force Research Laboratory* (**38**, 4, p. 590) Article

A01-078 Direct Simulation of Apex Enhancement on the Flux onto European Retrievable Carrier. Jingqi Miao, *University of Kent at Canterbury, England, UK*; and J.P.W. Stark, *University of London, England, UK* (**38**, 4, p. 594) Article

A01-079 Development of a Target Marker for Landing on Asteroids. Shujiro Sawai, *University of Michigan*; Jun'ichiro Kawaguchi, *Institute of Space and Astronautical Science, Japan*; Daniel Scheeres, *University of Michigan*; and Naoki Yoshizawa and Masahiro Ogasawara, *NEC Aerospace Systems, Ltd., Japan* (**38**, 4, p. 601) Article

A01-080 Photometry of Global Positioning System Block II and IIA Satellites on Orbit. Henry F. Fliegel and Lori F. Warner, *The Aerospace Corporation*; and Frederick J. Vrba, *U.S Naval Observatory* (**38**, 4, p. 609) Article

A01-081 Simulating Ionospheric Plasma with a Hollow Cathode in a Large Vacuum Chamber. Sven G. Bilén, *Pennsylvania State University*; Matthew T. Domonkos, *NASA John H. Glenn Research Center*; and Alec D. Gallimore, *University of Michigan* (**38**, 4, p. 617) Article

A01-082 GEOSAIL: Exploring the Geomagnetic Tail Using a Small Solar Sail. Colin R. McInnes and Malcolm Macdonald, *University of Glasgow, Scotland, UK*; Vassilis Angelopolous, *University of California*; and David Alexander, *Lockheed Martin Solar and Astrophysics Laboratory* (**38**, 4, p. 622) Article

A01-083 X-33 Experimental Aeroheating at Mach 6 Using Phosphor Thermography. Thomas J. Horvath, Scott A. Berry, Brian R. Hollis, Derek S. Liechty, H. Harris Hamilton, II, and N. Ronald Merski, *NASA Langley Research Center* (**38**, 5, p. 634) Article

A01-083.5 Evaluation of High-Temperature Multilayer Insulation for Inflatable Ballute. Frank M. Kustas, Suraj P. Rawal, and William H. Willcockson, *Lockheed Martin Space Systems Company*; Carl T. Edquist and Janine M. Thornton, *Lockheed Martin Astronautics Operations*; and Chuck Sandy, *ILC Dover, Inc.* (**38**, 5, p. 634) Engineering Note

A01-084 X-33 Hypersonic Boundary-Layer Transition. Scott A. Berry, Thomas J. Horvath, Brian R. Hollis, Rick A. Thompson, H. Harris Hamilton, and II, *NASA Langley Research Center* (**38**, 5, p. 646) Article

A01-085 X-33 Computational Aeroheating Predictions and Comparisons with Experimental Data. Brian R. Hollis, Thomas J. Horvath, Scott A. Berry, H. Harris Hamilton, and II, Richard A. Thompson and Stephen J. Alter, *NASA Langely Research Center* (**38**, 5, p. 658) Article

A01-086 X-33 Hypersonic Aerodynamic Characteristics. Kelly J. Murphy and Robert J. Nowark, Richard A. Thompson, and Brian R. Hollis, *NASA Langley Research Center*; and Ramadas Prabhu, *Lockheed-Martin Engineering & Sciences* (**38**, 5, p. 670) Article

A01-087 X-33 Aerodynamic Computations and Comparisons with Wind-Tunnel Data. Brian R. Hollis, Richard A. Thompson, Kelly J. Murphy, Robert J. Nowak, Christopher J. Riley, and William A. Wood, Stepehn J Alter, *NASA Langley Research Center*, Ramadas K. Prabhu, *Lockheed Martin Engineering and Sciences* (**38**, 5, p. 684) Article

A01-088 Effect of Noise on Roughness-Induced Boundary-Layer Transition for Scramjet Inlet. Takeshi Ito, *National Aerospace Laboratory, Japan*; and Laura A. Randall and Steven P. Schneider, *Purdue University* (**38**, 5, p. 692) Article based on AIAA Paper 2000-0284

A01-089 Assessment of One- and Two-Equation Turbulence Models for Hypersonic Transitional Flows. Christopher J. Roy and Frederick G. Blottner, *Sandia National Laboratories* (**38**, 5, p. 699) Article based on AIAA Paper 2000-0132

A01-090 Computational Fluid Dynamics Analysis of a Missile with Grid Fins. James DeSpirito, Harris L. Edge, Paul Weinacht, and Jubaraj Sahu, *U.S. Army Research Laboratory*; and Surya P.G. Dinavahi, *Mississippi State University* (**38**, 5, p. 711) Article based on AIAA Paper 2000-0391

A01-091 Fast-Response Heat-Flux Sensor Development for Measurement Commonality in Hypersonic Wind Tunnels. Carl T. Kidd and John C. Adams Jr., *Sverdrup Technology, Inc., AEDC Group* (**38**, 5, p. 719) Article based on AIAA Paper 2000-2514

A01-092 Mars Rocket Vehicle Using In-Situ Propellants. Geoffrey A. Landis and Diane L. Linne, *NASA John Glenn Research Center* (**38**, 5, p. 730) Article based on AIAA Paper 2000-3120

A01-093 Low-Cost Main-Belt Asteroid Sample Return. Alexander A. Sukhanov, *Space Research Institute (IKI) of Russian Academy of Sciences, Russia*; Otavio Durao, *National Institute for Space Researches (INPE), Brazil*; and Daniela Lazzaro, *National Observatory, Brazil* (**38**, 5, p. 736) Article

A01-094 Comparative Analysis of Current NASA Human Mars Mission Architectures. Benjamin B. Donahue, *Boeing Phantom Works*; and Mike L. Cupples, *DESE Research* (**38**, 5, p. 745) Article based on AIAA Paper 2000-3215

A01-095 Comparison of Glideback and Flyback Boosters. M.R. Tetlow, *Adelaide University, Australia*; U.M. Schottle, *Stuttgart University, Germany*; and G.M. Schneider, *Adelaide University, Australia* (**38**, 5, p. 752) Article

A01-096 Gravitational Effects of Earth in Optimizing ΔV for Deflecting Earth-Crossing Asteroids. I. Michael Ross, Sang-Young Park, and Scott D.V. Porter, *Naval Postgraduate School* (**38**, 5, p. 759) Article

A01-097 Extremal Rocket Motion with Maximum Thrust in Linear Central Field. Dilmurat M. Azimov and Robert H. Bishop, *The University of Texas at Austin* (**38**, 5, p. 765) Article

A01-098 Gasdynamics and Heat Transfer Modeling in Rocket Joints. Qunzhen Wang, Edward C. Mathias, Joe R. Herman, and Corey W. Smith, *Thiokol Propulsion* (**38**, 5, p. 777) Article

A01-099 Reliability Analysis of Space Exploration Truss Support Structures. Sankaran Mahadevan, *Vanderbilt University*; and Prakash Raghothamachar, *Factory 23 Inc.*, (**38**, 5, p. 789) Article

A01-100 Practical Prediction of Supersonic Viscous Flows over Complex Configurations Using Personal Computers. Vahid Esfahanian, *Mechanical Engineering Department, University of Tehran, Iran*; A. Azimi *Sharif University of Technology*, Iran; K. Hejranfar, *University of Tehran*, Iran (**38**, 5, p. 795) Engineering Note

A01-101 Catalytic Model on SiO2-Based Surface and Application to Real Trajectory. Takuji Kurotaki, *National Aerospace Laboratory, Japan* (**38**, 5, p. 798) Engineering Note based on AIAA Paper 2000-2366

A01-102 Aerodynamic Database Development for the Hyper-X Airframe-Integrated Scramjet Propulsion Experiments. Walter C. Engelund, Scott D. Holland, Charles E. Cockrell Jr., *NASA Langley Research Center*; Robert D. Bittner, *FDC-NYMA, Inc.* (**38**, 6, p.803) Article

A01-103 Hyper-X Stage Separation Wind Tunnel Test Program. William C. Woods, Scott D. Holland, and Michael DiFulvio, *NASA Langley Research Center* (**38**, 6, p.811) Article

A01-104 Computational Fluid Dynamics Prediction of Hyper-X Stage Separation Aerodynamics. Peiter G. Buning, *NASA Langley Research Center*; Tin-Chee Wong, Arthur D. Dilley, and Jenn L. Pao, *FDC/NYMA, Inc.* (**38**, 6, p.820) Article

A01-105 Hyper-X Research Vehicle Experimental Aerodynamics Test Program Overview. Scott D. Holland, William C. Woods, and Walter C. Engelund, *NASA Langley Research Center* (**38**, 6, p.828) Article

A01-106 Integrated Aeropropulsive Computational Fluid Dynamics Methodology for the Hyper-X Flight Experiment. Charles E. Cockrell and Walter E. Engelund, *NASA Langley Research Center*; Robert D. Bittner, Tom. N. Jentink, and Arthur D. Dilley, *FDC/NYMA, Inc.*; Abdelkader Frendi, *University of Alabama in Huntsville* (**38**, 6, p.836) Article

A01-107 Hyper-X Flight Engine Ground Testing for Flight Risk Reduction. Lawrence D. Huebner, Kenneth E. Rock, Edward G. Ruf, David W. White, *NASA Langley Research Center*; Earl H. Andrews Jr., *FDC/NYMA, Inc.* (**38**, 6, p.844) Article

A01-108 Hypersonic Boundary-Layer Trip Development for Hyper-X. Scott A. Berry and Aaron H. Auslender, *NASA Langley Research Center*; Arthur D. Dilley, *FDC/NYMA, Inc.*; and John F. Calleja, *General Applied Sciences Laboratory, Inc.* (**38**, 6, p.853) Article

A01-109 Multigrid Algorithm for Computing Hypersonic, Chemically Reacting Flows. Sung-soo Kim, Chongam Kim, and Oh-Hyun Rho, *Seoul National University, Korea* (**38**, 6, p.865) Article

A01-110 Kinectic Analysis of Hypersonic Laminar Separated Flows for Hollow Cylinder Flare Configurations. G. N. Markelov and M. S. Ivanov, *Institute of Theoretical and Applied Mechanics, Russia* (**38**, 6, p.875) Article

A01-111 The Interactions Between a Canard and Thick Bodies: Characteristics of the Components. Asher Sigal and Michael Victor, *Technion-Israel Institute of Technology, Israel* (**38**, 6, p.882) Article

A01-112 The Interactions Between a Canard and Thick Bodies: Analysis and Applications. Asher Sigal, *San Diego State University* (**38**, 6, p.882) Article

A01-113 Analytical Space Trajectories for Extermal Motion with Low-Thrust Exhaust-Modulated Propulsion. Robert H. Bishop and Dilmurat M. Azimov, *The University of Texas at Austin* (**38**, 6, p.897) Article

A01-114 Using Motorized Thethers for Payload Orbital Transfer. Spencer W. Ziegler and Mathew P. Cartmell, *University of Glasgow, Scotland, U.K.* (**38**, 6, p.904) Article

A01-115 Dynamic Behavior of a Tethered System with Multiple Subsatellites in Elliptic Orbits. Noboru Takeichi, *University of Tokyo, Japan*; M. C. Natori and Nobukatsu Okuizumi, *Institute of Space and Astronautical Science, Japan* (**38**, 6, p.914) Article

A01-116 Spacecraft Charging at Geosynchronous Altitudes: New Evidence of the Existence of Critical Temperature. Shu T. Lai and Devin J. Della Rose, *U.S. Air Force Research Laboratory* (**38**, 6, p.922) Article

A01-117 Dispersion Reduction of a Direct Fire Rocket Using a Lateral Pulse Jets. Thanat Jitpraphai and Mark Costello, *Oregon State University* (**38**, 6, p.929) Article

A01-118 Optimization of a Low-Gravity Two-Phase System for Lunar Heat Rejection. Terrence L. Chambers and William E. Simon, *University of Louisiana at Lafayette*; Fred M. Young, *Lamar University* (**38**, 6, p.937) Article

A01-119 Transitional Flow Over an Elliptic Cone at Mach 8. Xudong Xiao, J. R. Edwards, and H. A. Hassan, *North Carolina State University* (**38**, 6, p.941) Article

A01-120 Blowdown Arc Facility for Low-Density Hypersonic Wind-Tunnel Testing. Gennaro Zuppardi and Antonio Esposito, *Università di Napoli "Federico II," Italy* (**38**, 6, p.946) Engineering Note

Statement of Ownership, Management, and Circulation

1. Publication Title	2. Publication Number	3. Filing Date
Journal of Spacecraft and Rockets	0 0 2 2 - 4 6 5 0	10/1/01
4. Issue Frequency: Bi-monthly	5. Number of Issues Published Annually: 6	6. Annual Subscription Price: 350/$460

7. Complete Mailing Address of Known Office of Publication (Not printer) (Street, city, county, state, and ZIP+4): American Institute of Aeronautics and Astronautics 1801 Alexander Bell Dr., Reston, VA, 20191 — Contact Person: Luke McCabe; Telephone: 703.264.7500

8. Complete Mailing Address of Headquarters or General Business Office of Publisher (Not printer): AIAA (above)

9. Full Names and Complete Mailing Addresses of Publisher, Editor, and Managing Editor (Do not leave blank)

Publisher (Name and complete mailing address): Norma Brennan, AIAA (Above)

Editor (Name and complete mailing address): E.Vincent Zoby, NASA-Langley Research Center, Hampton, VA, 23681

Managing Editor (Name and complete mailing address): Luke McCabe, AIAA (above)

10. Owner (Do not leave blank. If the publication is owned by a corporation, give the name and address of the corporation immediately followed by the names and addresses of all stockholders owning or holding 1 percent or more of the total amount of stock. If not owned by a corporation, give the names and addresses of the individual owners. If owned by a partnership or other unincorporated firm, give its name and address as well as those of each individual owner. If the publication is published by a nonprofit organization, give its name and address.)

Full Name	Complete Mailing Address
American Institute of Aeronautics and Astronautics	1801 Alexander Bell Dr.,Reston,VA,20191

11. Known Bondholders, Mortgagees, and Other Security Holders Owning or Holding 1 Percent or More of Total Amount of Bonds, Mortgages, or Other Securities. If none, check box: → ☐ None

Full Name	Complete Mailing Address

12. Tax Status (For completion by nonprofit organizations authorized to mail at nonprofit rates) (Check one)
The purpose, function, and nonprofit status of this organization and the exempt status for federal income tax purposes:
☒ Has Not Changed During Preceding 12 Months
☐ Has Changed During Preceding 12 Months (Publisher must submit explanation of change with this statement)

PS Form 3526, October 1999 (See Instructions on Reverse)

13. Publication Title: Journal of Spacecraft and Rockets	14. Issue Date for Circulation Data Below: September-October 2001	
15. Extent and Nature of Circulation	Average No. Copies Each Issue During Preceding 12 Months	No. Copies of Single Issue Published Nearest to Filing Date
a. Total Number of Copies (Net press run)	2217	2300
b. Paid and/or Requested Circulation (1) Paid/Requested Outside-County Mail Subscriptions Stated on Form 3541. (Include advertiser's proof and exchange copies)	1667	1714
(2) Paid In-County Subscriptions Stated on Form 3541 (Include advertiser's proof and exchange copies)		
(3) Sales Through Dealers and Carriers, Street Vendors, Counter Sales, and Other Non-USPS Paid Distribution		
(4) Other Classes Mailed Through the USPS		
c. Total Paid and/or Requested Circulation (Sum of 15b. (1), (2),(3),and (4))	1667	1714
d. Free Distribution by Mail (Samples, complimentary, and other free) (1) Outside-County as Stated on Form 3541	19	19
(2) In-County as Stated on Form 3541		
(3) Other Classes Mailed Through the USPS		
e. Free Distribution Outside the Mail (Carriers or other means)		
f. Total Free Distribution (Sum of 15d. and 15e.)	19	19
g. Total Distribution (Sum of 15c. and 15f)	1686	1733
h. Copies not Distributed	531	567
i. Total (Sum of 15g. and h.)	2217	2300
j. Percent Paid and/or Requested Circulation (15c. divided by 15g. times 100)	75.2%	74.5%

16. Publication of Statement of Ownership
☒ Publication required. Will be printed in the Nov-Dec 2001 issue of this publication. ☐ Publication not required.

17. Signature and Title of Editor, Publisher, Business Manager, or Owner: Norma Brennan, Director of Publication — Date: 11/7/01

I certify that all information furnished on this form is true and complete. I understand that anyone who furnishes false or misleading information on this form or who omits material or information requested on the form may be subject to criminal sanctions (including fines and imprisonment) and/or civil sanctions (including civil penalties).

Instructions to Publishers

1. Complete and file one copy of this form with your postmaster annually on or before October 1. Keep a copy of the completed form for your records.
2. In cases where the stockholder or security holder is a trustee, include in items 10 and 11 the name of the person or corporation for whom the trustee is acting. Also include the names and addresses of individuals who are stockholders who own or hold 1 percent or more of the total amount of bonds, mortgages, or other securities of the publishing corporation. In item 11, if none, check the box. Use blank sheets if more space is required.
3. Be sure to furnish all circulation information called for in item 15. Free circulation must be shown in items 15d, e, and f.
4. Item 15h., Copies not Distributed, must include (1) newsstand copies originally stated on Form 3541, and returned to the publisher, (2) estimated returns from news agents, and (3), copies for office use, leftovers, spoiled, and all other copies not distributed.
5. If the publication had Periodicals authorization as a general or requester publication, this Statement of Ownership, Management, and Circulation must be published; it must be printed in any issue in October or, if the publication is not published during October, the first issue printed after October.
6. In item 16, indicate the date of the issue in which this Statement of Ownership will be published.
7. Item 17 must be signed.

Failure to file or publish a statement of ownership may lead to suspension of Periodicals authorization.
